The craze for buying which began to show itself yesterday was present again at the opening and was augmented on every hand as the session advanced. The seats, the floor, and the galleries of the board were crowded with spectators and speculators, largely visiting stockmen, all eagerly trading. Advances in wheat were Ps. in corn 1% and in oats 1%. Profit taking on an enormous scale, however, took much of the strength of the market and December wheat closed only 4% c up and May wheat %c up; corn for December delivery 40% higher; May oats 420%c advanced. Provisions closed 17% to 25c up.

Wheat, as yesterday, seemed to be in most demand, though it held poorly. A general bull movement, almost regardless of the usual influencing conditions, seemed to control the transactions. The countryside seemed to have arisen as one man and rushed to this market to buy. Not since the present bull campaign began have brokerage and commission people been pressed to handle speculative orders as they have today.

No man or firm was big enough in the perfect storm of business to be "prominent" in the pit. Offerings, which were very liberal at the very start, were absorbed as so much water in a sponge. News in itself was not very bullish. Cables showed very little response to yesterday's feeling here. Local and northwestern receipts were small and showed a gradual decrease. But primary receipts were rather liberal and clearances were not large.

Outside markets, however, did not show a big increase. Prices for all options 55g. Lifernia, 200@56c; 200@57c; 200@56½c; 1 5c; 200@54½c; 900@54c. UPWARD STOCK MOVEMENT CHECKED ON WALL STREET

New York, Dec. 5.—The upward move ment in stocks, which gained some force yesterday afternoon, came to an end this morning in the face of realizing by speculative pools who have nurtured the advance in the prominent stocks. The perception of this realizing checked the following among the professional trader and led to a reactionary tendency all through the market. The factors a work in the money market leading the depletion of the cash reserves of the banks begot a spirit of caution in the incurring of liabilities for speculative purposes.

The market started off briskly and strongly, with yesterday's leadership fully maintained to all appearances, but the sharp gains by a few stocks and the sustaining influence of these was taken advantage of to realize. Before the market closed the early gains were wiped out except in a few instances, and the average level of prices at the close will be carn to be lower than last night. The selling of stocks grew notably less as the decline in prices proceeded, and the market sank into extreme duliness at the low level.

The loss thus far this week to the subtreasury of \$5,874,000 serves as a warning note to the optimists on the money outlook. The disbursements on government account nave neen very light during the week and the offerings of government bonds for redemption have receded to nominal figures, notwithstanding the withdrawal of bonds on deposit to secure circulation up to the full limit allowed for the month, and presumably for the purpose of offering them for redemption.

Assertions that receipts of cash from the interior on the express movement are largely in excess of shipments are not entirely reassuring, in view of the fact that deposits at the sub-treasury for transfer to the interior entered the sub-treasury for the sub-treasury.

largely in excess of shipments are not entirely reassuring, in view of the fact that deposits at the sub-treasury for transfer to the interfor already exceed half a million dollars for the week. New York exchange at Chicago fell to 40c discount today. On the international exchange there was an easier tone in the sterling exchange market, but continental exchange hardened. Money was in active demand in London to pay the installment due on the British loan, the price of gold advanced and a stiff money rate is expected there for the rest of the year and into January. The private discount rate rose in Paris today and the sterling rate there receded further.

The possibility of further gold exports next week is thus clearly foreshadowed. Between now and Dec. 20 the local money market has to make provision for the Standard Oil dividend disbursement of \$8,000,000 and a 1 per cent dividend on United States Steel common stock, which calls for upward of \$6,000,000. There was no infined states Steel common stock, which calls for upward of \$6,000,000. There was no infined states steel common stock, which calls for upward of \$6,000,000. There was no infined arrived to make provision of the stock market.

A renewed decline in Amalgamated Copper after some early firmness, in spite of the recovery in the raw copper market in London, was also an unsettling influence in stocks. The market closed dull and generally heavy.

The railroad bond market was steady for a time, but became irregular in sympathy with stocks. Total sales (par value), 4,420,000. Bonds were all unchanged on the last call.

New York, Dec. 5.—Commercial Advertiser's London financial cablegram: Bear covering caused a further all round rally in the stock market today. Consols rose to 92%. American shares were idle, though generally firm. This firmness was assisted by Secretary Gage's report, the cessation of gold shipments and the recovery in copper to £58 at ton. Rio Tintos sympathetically rose to 42% on rumors than the Amalgamated Copper company and approached the leading Calumet customers, offering to supply copper below Calumet, whatever the prices of the latter might be.

Silver rallied to 256-16, but America is is to be. Silver rallied to 25-5-16, but America is fering heavily a shade above this. Paris change is 25½.
